Reports of the Indian Government to expand the use of Aadhaar number mandatorily for multiple services like filling Income Tax returns and obtaining a PAN, verification for mobile users, driving licenses, benefits for AIDS patients, etc. have raised privacy concerns regarding the UIDAI project across the country.

Opposition as well as other sections of the society demand a data privacy legislation or an adequate legal framework for data protection, in wake of extensive use of Aadhaar number.

A blog by Fallible, a cyber security company reports about leak of personal data of 2.2 million users of McDonald’s India’s app users raises privacy and data protection concerns.

Right to be Forgotten: A Tale of Two Judgements

By AMBER SINHA

In the last few months, there have been contrasting judgments from two Indian high courts, Karnataka and Gujarat, on matters relating to the right to be forgotten. The two high courts heard pleas on issues to do the right of individuals to have either personal information redacted from the text of judgments available online or removal of such judgment from publically available sources. This post tries to understand the global jurisprudence on the right to be forgotten, and how the contrasting judgments in India may be located within it.

It’s the technology, stupid

MARCH 31, 2017

In this article, Sunil Abraham lists eleven reasons why the Aadhaar is not just non-smart but also insecure.

The 12-digit conundrum

MARCH 13, 2017

Even as the Centre plans to link as many as 500 schemes to Aadhaar, concerns over data safety are rising. Sunil Abraham was quoted.

व्या आधार पर जल्दबाज़ी में है सरकार?

MARCH 27, 2017

Amber Sinha appeared on NDTV Prime Time on March 26 hosted by Ravish Kumar, in a debate on the privacy implications of Aadhaar with Ram Sevak Sharma, TRAI Chairman and former Director General, UIDAI.

Why We Should All Worry About The Mandatory Imposition Of Aadhaar

MARCH 24, 2017

It appears that with each passing day, the government is linking an increasing number of benefits and government services to the 12-digit biometric-based Aadhaar number for Indians, despite growing concerns around its data privacy and security. Sunil Abraham was quoted in this article.

Privacy concerns multiply for Aadhaar, India’s national biometric identity registry

MARCH 17, 2017

The largest and most sophisticated biometric identity system of any country in the world, India’s Aadhaar, is sparking new fears that the personal data it stores on more than 13 billion people could be vulnerable to exploitation. Sunil Abraham was quoted in this article.

No ID, no benefits: thousands could lose lifeline under India’s biometric scheme

MARCH 21, 2017

Controversial Aadhaar card restricts fundamental rights, argue critics, limiting access to free school meals and exposing 1 billion people to privacy risks. Sumandro Chattapadhyay was quoted in this article.

Nasscom chief saying full data protection isn’t possible should wake us from our digital slumber

MARCH 16, 2017

Considering India is rapidly moving towards a digital economy, the hurdles notwithstanding, data and identity security are topics which have to be taken very seriously. Since the demonetisation, a large part of the population who would never bother with digital transactions has suddenly come online. But there is no such thing as complete security of personal data, according to Nasscom chief R Chandrashekhar. Pranesh Prakash was quoted in this report.
