The everyday face of Azerbaijan's "rentier state"

Posted on [October 9, 2012](#) by [Lucy Wallwork](#) | [Leave a comment](#)

Visualisation of mortality data of British army, Crimean War, 1856

DIAGRAM OF THE CAUSES OF MORTALITY IN THE ARMY IN THE EAST.

The Areas of the blue, red, & black wedges are each measured from the centre as the common vertex.

The blue wedges measured from the centre of the circle represent area for area the deaths from Preventible or Mitigable Zymotic diseases; the red wedges measured from the centre the deaths from wounds; & the black wedges measured from the centre the deaths from all other causes.

The black line across the red triangle in Nov^r 1854 marks the boundary of the deaths from all other causes during the month.

In October 1854, & April 1855, the black area coincides with the red; in January & February 1856, the blue coincides with the black.

The entire areas may be compared by following the blue, the red & the black lines enclosing them.

Tracking India's Social Sector Budgets

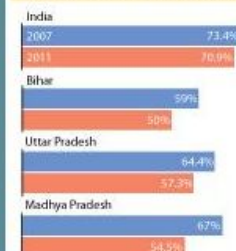

How does the government of India spend its money?

Expenditures lie at the core of state accountability. Yet in India, we have remarkably little accessible information on government spending. To bridge this gap, we produce Budget briefs (BB): easy to understand 4 page analysis of GOI expenditure for public services. Each BB is accompanied by visual interpretations of the underlying data, contributed by individuals who love data. If you are one of them, go ahead, download our datasets and send us your interpretation.
